

How do teams write subtasks

My brief answer is that in scrum, we usually (but don't have to) create sub-tasks for user stories. These are technical tasks of the form "create database columns" or "write login script". However the nature of the task depends on the developer's approach, the technology and the language that the team feel most comfortable in.

The image is a screenshot of a webpage titled "Scrum To-do List" by Pashun Consulting LTD. The page features a list of tasks for a Scrum team, such as "To update list of requirements from daily scrum, email and other contact", "To create user requirements about...", "To create user stories about...", "To create sprint report to the Product Owner", "To check up any information pending up sprint meeting log. (Next sprint is supplied or not)", "To make user feedback and user stories are visible in team room", "To arrange meetings and have them to reach any new or modify team members, product owners or stakeholders". Below the list, there is a "NOTE" section and a "Download the FREE Ebook (Limited Time Offer)" button. A red arrow points from the text "Grab it now !" to the "Download the FREE Ebook" button.
